

RTIG Library Catalogue

About this Catalogue

This Library Catalogue lists the complete set of formal RTIG documents.

Each document has been assigned a number in the RTIG Library and is listed according to that number. The Catalogue outlines the content of each document and lists its most up to date version. The status box describes who has revised, reviewed or authorised the document (if applicable).

Documents which have been made obsolete or have been superseded are listed in the Archived Documents section at the end of this Catalogue.

Effective date

This version of the Catalogue was updated on 1 May 2007. Users are advised to check for updates.

Availability of documents

For each document, its availability to members and non-members is indicated. Some documents are available only to certain classes of members, as determined by the Executive Committee. Documents in progress are normally only available to the project team, which may include RTIG non-members.

A charge may be levied for access to RTIG documents. This fee is not given a numerical value but simply indicated as S (small fee for general reviews and notes), M (medium fee for larger scale guidelines and shorter technical documents), L (large fee for full-scale technical specifications), or X (not available outside RTIG).

The charge is not payable:

- by any RTIG member (subscribing or affiliate) for technical documents, once approved at Executive Committee level;
- by any Foundation or Full member for guidance documents;
- by client organisations (eg central Government for project reports that they have funded or helped to fund);
- where waived specifically by the Executive Committee (eg for RTIG non-members who have contributed in kind to the development of a document).

In addition to the charge, a small administrative fee may be made for producing and issuing documents in hard copy.

How to use this Catalogue

Documents may be requested from the RTIG Librarian (currently Leslie Knoop at Centaur Consulting, leslie.knoop@centaurconsulting.co.uk) who will be able to send the document either electronically or by post.

If the document(s) you request attract a charge, you will be informed of this when you request the document. Provided you accept this in writing, an invoice will be sent with the document. Charges are payable to RTIG Limited.

A price list is available upon request.

Copyright

All documents listed in the RTIG Library Catalogue are copyrighted and may not be circulated or reproduced without the explicit corporate consent of RTIG Limited.

Please respect this. Many RTIG documents were developed through the funding made available through member contributions. It is not fair on those who have paid for others to benefit without payment. Besides, this could jeopardise RTIG's ability to develop other standards and guidelines in future.
